

2025-2026 5TH-6TH GRADE PROGRAM

WHAT WE LEARN

With an integrated approach to language arts, your child learns how spelling, vocabulary, penmanship, reading, grammar, and composition work together. Arithmetic leads your child from the known to the unknown with studies of fractions, decimals, proportions, and percents, among other topics. A study in United States history from a Christian perspective opens up the world for your child. General science and health education leads students to be good stewards of the life and world God has created. Through daily Bible lessons, your child will see how God can do mighty acts when a person has faith in Him.
